

ROSTER OF GERMANS WITH THE CRESCENT

FULL FACTS ABOUT KAISER'S SUBJECTS IN THE EMPLOY OF TURKEY

(By Associated Press.)
CONSTANTINOPLE, June 20.—For the first time since the war began the full facts are now made known as to the number, and nature of service, of the German officers and men in the Ottoman army. At the present time 360 officers and 1867 non-commissioned officers and men of German origin are serving with the Turkish army, navy and coast defense system.

Of this number 253 officers and 517 non-commissioned officers are attached to the mobile army and interior fortifications; while 107 officers and 1350 non-commissioned officers and men serve in the Ottoman navy and the coast batteries.

Nearly all the German officers and men in the Ottoman army reached Turkey early in 1915, by way of Rumania and Bulgaria, while the German members of the Ottoman navy came largely from the German battle cruiser "Goeben" and the small cruiser "Breslau," and from German merchant vessels interned at Constantinople when the war broke out. Some of them came to Turkey over the Balkan route during 1915 and during the present year.

All of them have been "loaned" to the Turkish government, that is to say while they actually enter the military service of the Sultan they never lose their German citizenship or divest themselves of the obligation to serve in the German army.

FEATHERWEIGHT WRESTLER WANTS TO MAKE MATCH

Vernon Breedlove, American featherweight champion wrestler, is open to meet any man in the world, between 122 and 130 pounds. He has handled over 500 men in seven years' experience, and out of that number there were but two who vanquished him on the mat. Breedlove claims to be in the pink of condition and would like to arrange a match with some one in Tonopah, to take place on or about the Fourth of July.

U.S. Gov. experts report that oils correctly refined from asphalt-base crude "distill without decomposition" (do not break up and lose their lubricating value under cylinder heat) and "are much better adapted to motor cylinders, as far as their carbon-forming proclivities are concerned, than are paraffine-base Pennsylvania oils."

Motorists who use Zerolene, an oil scientifically refined from asphalt-base crude, back up the experts with reports such as these: "Covered over 16,000 miles without adjusting valves or cleaning out carbon."—"The carbon taken out of this car in 50,000 miles amounted to less than an ounce." Zerolene is for sale at dealers everywhere and at service stations and agencies of the Standard Oil Company

NEW ZINC FIELDS IN OLD LEAD BELT

DISCOVERY OF IMPORTANCE TO WHITE PINE COUNTY OWING TO HIGH PRICE OF SELLER

The discovery of extensive zinc deposits over a field from one and a half miles wide to three miles in length, in what has heretofore been considered as a lead district, almost adjoining the big smelting plant at McGill, is a matter of great importance not only to White Pine county, but to the entire state of Nevada as well. This district has been worked for its lead ore more or less continuously for the past 25 or 30 years, but owing to the very low price of lead, the operators were only partially successful.

Recently Henry Goodman, of Goodman Brothers of McGill, who has had considerable mining experience, discovered that some of these properties carried zinc ore. He then secured a lease on property owned by Charles Holmes of McGill, after which he induced Mr. Buckley, of Eureka, Utah, to become associated with him in the enterprise. Mr. Buckley was the first man to ship zinc from the mines of Flintic, and is therefore familiar with zinc ores, and after an examination of the property and the district, gave it as his opinion that the district would develop into an extensive producer of zinc.—Ely Record.

TWELVE PER CENT TUNGSTEN FROM CLAIM AT MCKAY

If McKay City had been established a few months earlier, when the tungsten boom was in its incipency, it would now be one of the greatest producers in the United States.

There are scores of ledges, ranging from two to 130 feet in width and all of them carry tungsten averaging better than one per cent in scheelite that is easily concentrated.

Recently N. C. Ableman and associates have been getting splendid assays of silver in their properties there, but what was the most pleasing was to receive a twelve per cent tungsten assay yesterday from their deepest working.

MUST HAVE TICKET TO PROCURE MEAT

CONSUMERS ARE SUPPLIED ONLY ON STATED DAYS AND HOURS

(By Associated Press.)
BERLIN, June 20.—Teh suburb of Grunewald has adopted a unique method of dispensing with crowds waiting outside of butcher shops by announcing that it is to give to each of its citizens a number, according to which each inhabitant will be enabled to buy meat on specified days.

The butchers will be notified regularly that on Monday meat may be sold to a given set of numbers (dependent in size upon the available supply of meat on hand), on Wednesday to another specified set, and so forth. The plan, it is believed, will result in an absolutely equitable distribution of the supply.

JAP HOSPITAL GIVES BACK GERMAN FUNDS

MONEY FOR OPERATING ROOM REFUSED OWING TO THE GERMAN OPPOSITION

(By Associated Press.)
KOBE, Japan, June 20.—The subscribers to the proposed reconstructed international hospital at Kobe have voted to return to the German subscribers the gift of \$7000 which they made to found a "Kaiser Wilhelm II Operating Room" in the hospital. On account of their objection to the methods of German warfare the subscribers, mostly English, decided that they did not wish any part of the hospital to be named after the German Emperor. They started to collect a fund to take the place of the German gift and the total amount was recently made up.

AMERICAN SCIENTIST AFTER CHINESE FAUNA

GOES TO INTERIOR TO HUNT BIG GAME AND SECURE RARE SPECIMENS

(By Associated Press.)
PEKING, June 20.—Roy Chapman Andrews of the American Museum of Natural History, New York, left Peking today for the interior of China, where he will remain for a year or more hunting big game and studying the wild animals in portions of China hitherto not invaded by zoologists.

Mr. Andrews went from Peking to Foochow, and from that point will sail to Haiphong and make his way overland into Kweichow province, which will be the scene of most of his exploration work. Mr. Andrews is accompanied by his bride, who is the daughter of Colonel Henry Borup of the United States army, and a sister of the late George Borup, the Arctic explorer.

Mrs. Andrews is an expert photographer, and will be the official photographer of the expedition. Among the animals known to exist in the interior of Kweichow province are the takin, the goral and serow. The takin is an animal of bright yellow color as large as a cow, but similar to the goat in appearance. Mr. and Mrs. Andrews hope to get specimens of these rare animals, as well as photographs which will show them in their native surroundings.
